

David Page Associates Limited

Environmental Policy

We are a small business and so our impact on the environment is not large. However, like all businesses we recognise that we have a responsibility to minimise our environmental impact as much as possible.

So what can we do?

Business Travel

Wherever possible we try to conduct our business without the need for extensive travelling and meetings. This benefits the environment in the form of reduced emissions and also there is a cost saving to the client.

Use of Paper

To keep our use of paper to a minimum -

- We encourage all clients to send information to us electronically
- We try keep the use traditional paper files to a minimum by using and saving digital files
- We email invoices to clients
- We file company accounts online with our accountants

Packaging and materials

- We reduce waste through re-use and recycling and by purchasing recycled, recyclable materials where alternatives are available, economical and suitable
- We avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of
